Discovery of Atlantis Robert Sarmast, 2004 Plato provided 53 physical clues in his famous dialogue Critias -- the original account of the story of Atlantis that is the sole basis of all Atlantis research. The book proves that the island of Cyprus and the underwater landscape just south of Cyprus is a perfect match with 51 of these clues. Exclusive 3D bathymetric maps based on new scientific data show for the first time a stretch of sunken land off of Cyprus. The general layout of the landscape of Atlantis as described by Plato is easily discernible on this underwater land mass, as well as the precise location of its capital-Atlantis City. This robust empirical data is joined with other original findings based on mythological analysis and historical research, making the case for Cyprus increasingly obvious. With this compelling new interpretation of Plato, author Robert Sarmast brings the legendary island of Atlantis alive for the first time. With the location so clearly mapped in this book, the next step in this exciting research is an expedition to the region. Humankind may soon witness the filming of the colossal ruins of this once-mighty empire and proceed to resurrect Atlantis from its watery tomb!

IELTS the Vocabulary Files Andrew Betsis, Lawrence Mamas, 2013 This student text book is aimed at advanced C1 level learners. The aim of the series is to give students the chance to expand their vocabulary in different areas. Each unit deals with a common vocabulary topic; the vocabulary is taught through a variety of exercises with lots of illustrations to make them more lively and interesting. This series can be used as Time Fillers; when teachers have some extra time and they need something to do to help students revise what they have already been taught. Alternatively, it can also be used to help weak students enrich their vocabulary in various common topics. Levels B1, B2, C1 and C2 in this series have also been written for students who are planning to take the IELTS exam. They cover some of the main vocabulary points that IELTS candidates will need for the listening, reading, writing and speaking components of the exam. The vocabulary that students acquire in each of these books will help them to achieve the score they want in the IELTS exam. The 15 units in each of these books, focus on topic-specific vocabulary areas. These may be required in the IELTS exam (for example, economy, education, health, etc). Some Exercises focus on general vocabulary items which can be used in all aspects of the English language. Many of these words are relevant to specific tasks in the IELTS exam (for example, describing how something works, writing a letter or describing a house).

Upstream Virginia Evans, Lynda Edwards, 2007-01 The series is specially designed for students from intermediate to proficiency level. Each book consists of five modules and provides systematic preparation in all four language skills - listening, speaking, reading and writing - required at these levels. The Student's Book and the Workbook are designed to be covered in approximately 100 to 120 hours of classroom work.

Being a Beast Charles Foster, 2016-01-28 LONGLISTED FOR THE BAILLIE GIFFORD PRIZE 2016 Charles Foster wanted to know what it was like to be a beast: a badger, an otter, a deer, a fox, a swift. What it was really like. And through knowing what it was like he wanted to get down and grapple with the beast in us all. So he tried it out; he lived life as a badger for six weeks, sleeping in a dirt hole and eating earthworms, he came face to face with shrimps as he lived like an otter and he spent

hours curled up in a back garden in East London and rooting in bins like an urban fox. A passionate naturalist, Foster realises that every creature creates a different world in its brain and lives in that world. As humans, we share sensory outputs, lights, smells and sound, but trying to explore what it is actually like to live in another of these worlds, belonging to another species, is a fascinating and unique neuro-scientific challenge. For Foster it is also a literary challenge. Looking at what science can tell us about what happens in a fox's or badger's brain when it picks up a scent, he then uses this to imagine their world for us, to write it through their eyes or rather through the eyes of Charles the beast. An intimate look at the life of animals, neuroscience, psychology, nature writing, memoir and more, it is a journey of extraordinary thrills and surprises, containing wonderful moments of humour and joy, but also providing important lessons for all of us who share life on this precious planet.
