Lifeguard Training Activities and Games Susan J. Grosse, 2009-07-09 Lifeguard Training Activities and Games is a complete resource for aquatics managers or lifeguard supervisors responsible for conducting site-specific on-the-job training for lifeguards. The compilation of games, skill drills, activities, and guidance enhances training and conditioning of lifeguards and creates a high-performing staff. Throughout the book, the focus is on keeping activities fun and engaging to promote participation and ensure your lifeguards acquire the skills they need in order to take action in an emergency. The book contains more than 70 proven training activities divided into chapters by type of lifeguard skill. Each activity is short enough to be part of an in-service or class warm-up session. Most have variations, allowing for continued challenges of participants' performances through increasing levels of difficulty. The drills, games, and activities improve lifeguards' -general aquatic skills and physical fitness; -surveillance, emergency response, and rescue skills; and -teamwork and problem-solving skills. With this knowledge and training, you will be able to develop and maintain a high-performing lifeguard staff. Certification as a lifeguard is the first step in the overall training process. The real training begins on the job, and the responsibility for that training is left to the aquatics manager or lifeguard supervisor. Lifeguard Training Activities and Games makes that training fun, engaging, meaningful, and practical.

The Pandemic Century Mark Honigsbaum,2019-03-09 Like sharks, epidemic diseases always lurk just beneath the surface. This fast-paced history of their effect on mankind prompts questions about the limits of scientific knowledge, the dangers of medical hubris, and how we should prepare as epidemics become ever more frequent. Ever since the 1918 Spanish influenza pandemic, scientists have dreamed of preventing catastrophic outbreaks of infectious disease. Yet, despite a century of medical progress, viral and bacterial disasters continue to take us by surprise, inciting panic and dominating news cycles. From the Spanish flu and the 1924 outbreak of pneumonic plague in Los Angeles to the 1930 'parrot fever' pandemic and the more recent SARS, Ebola, and Zika epidemics, the last 100 years have been marked by a succession of unanticipated pandemic alarms. Like man-eating sharks, predatory pathogens are always present in nature, waiting to strike; when one is seemingly vanquished, others appear in its place. These pandemics remind us of the limits of scientific knowledge, as well as the role that human behaviour and technologies play in the emergence and spread of microbial diseases.

CPR/AED for the Professional Rescuer American Red Cross,2006 This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens

training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Evocative Autoethnography Arthur Bochner, Carolyn Ellis, 2016-03-21 This comprehensive text is the first to introduce evocative autoethnography as a methodology and a way of life in the human sciences. Using numerous examples from their work and others, world-renowned scholars Arthur Bochner and Carolyn Ellis, originators of the method, emphasize how to connect intellectually and emotionally to the lives of readers throughout the challenging process of representing lived experiences. Written as the story of a fictional workshop, based on many similar sessions led by the authors, it incorporates group discussions, common questions, and workshop handouts. The book: describes the history, development, and purposes of evocative storytelling; provides detailed instruction on becoming a story-writer and living a writing life; examines fundamental ethical issues, dilemmas, and responsibilities; illustrates ways ethnography intersects with autoethnography; calls attention to how truth and memory figure into the works and lives of evocative autoethnographers.

Small Unit Action in Vietnam, Summer 1966 Francis J. West, Jr. Jr Usmc West, Captain, 2014-06-10 The origin of this publication lies in the continuing program at all levels of command to keep Marines informed of the ways of combat and civic action in Vietnam. Not limited in any way to set methods and means, this informational effort spreads across a wide variety of projects, all aimed at making the lessons learned in Vietnam available to the Marine who is fighting there and the Marine who is soon due to take his turn in combat. Recognizing a need to inform the men who are the key to the success of Marine Corps operations—the enlisted Marines and junior officers of combat and combat support units—the former Assistant Chief of Staff, G-3, Major General William R. Collins, originated a project to provide a timely series of short, factual narratives of small unit action, stories which would have lessons learned as an integral part. Essential to General Collins' concept was the fact that the stories would have to be both highly readable and historically accurate. The basic requirement called for an author trained in the methodology of research, with recent active duty experience at the small unit level in the FMF, and a proven ability to write in a style that would ensure wide readership. This publication, then, is based upon first-hand, eyewitness accounting of the events described. It is documented by notes and taped interviews taken in the field and includes lessons learned from the mouths of the Marines who are currently fighting in Vietnam. It is published for the information of those men who are serving and who will serve in Vietnam, as well as for the use of other interested Americans, so that they may better understand the demands of the Vietnam conflict on the individual Marine.
