MacArthur Competence Assessment Tool for Treatment (MacCAT-T) Thomas Grisso,Paul S. Appelbaum,1998 The MacArthur Competence Assessment Tool for Treatment (MacCAT-T) is the product of an 8-year study of patients' capacities to make treatment decisions. It is a semi-structured interview that assists clinicians in assessing a patient's competence to consent to treatment. The process provides a patient with information about their medical/psychiatric condition, the type of treatment being recommended, its risks and benefits, as well as other possible treatments and their probable consequences. During this process, the MacCAT-T prompts the clinician to ask questions that assess the patient's understanding, appreciation, and reasoning regarding treatment decisions.The MacCAT-T Manual is a large-format, examiner-friendly field manual for conducting actual competency assessments. The MacCAT-T Record Form is well designed for recording, rating, and summarizing patient responses. The training videotape, Administering the MacCAT-T, demonstrates an actual administration of the test with discussion, comments, and annotations by Drs. Grisso and Appelbaum.The book, Assessing Competence to Consent to Treatment, describes the place of competence in the doctrine of informed consent, analyzes the elements of decision making, and shows how assessments of competence to consent to treatment can be conducted within varied general medical and psychiatric treatment settings. Includes numerous case studies.

MacArthur Competence Assessment Tool for Clinical Research (MacCAT-CR) Paul S. Appelbaum,Thomas Grisso,2001 The MacCAT-CR provides a structured format for capacity assessment that is adaptable to the particulars of any given research project. With the introduction of the MacCAT-CR, researchers enrolling human participants in their studieshave available for the first time a reliable and valid means of assessing their potential subject's capacity to consent to participation. The MacCAT-CR can typically be administered in 15-20 minutes. Beginning with project-specific disclosures to potential participants, the MacCAT-CR measures the four generally accepted components of decision-making competence: understanding, appreciation, reasoning, and the ability to express a choice. Quantification of subjects' responses permits comparisons across subjects and subject groups, and allows the MacCAT-CR to be used for not only for screening individual participants but also for conducting research on the characteristics of subject populations and for assessing the effectiveness

of interventions designed to increase subjects' capacities.

Evaluating Competencies Thomas Grisso,2006-01-27 This book offers a conceptual model for understanding the nature of legal competencies. The model is interpreted to assist mental health professionals in designing and performing assessments for legal competencies defined in criminal and civil law, and to guide research that will improve the practice of evaluations for legal competencies. A special feature is the book's evaluative review of specialized forensic assessment instruments for each of several legal competencies. Three-fourths of the 37 instruments reviewed in this second edition are new.

Adjudicative Competence Norman Godfrey Poythress,2002-08-31 Adjudicative competence remains an important topic of research and practice in psychology and law. In the five sections of *Adjudicative Competence: The MacArthur Studies*, the authors present not only a summary of the research of the MacArthur studies on competence but also an examination of the underlying theoretical work of Professor Richard Bonnie. It is the first publication to encapsulate the scope and significance of both the studies themselves and Bonnie's contributions. There is no other source available that addresses this range of topics. Given its breadth and scope, this book will be a must have for forensic mental health professionals, an important volume for lawyers, and a vital academic reference work.

Assessing Competence to Consent to Treatment Thomas Grisso,Paul S. Appelbaum,1998 This is a concise guidebook to the assessment of patients' capacities to consent to treatment. It will help clinicians focus on the abilities that are relevant to legal definitions of competence to consent to medical and psychological treatment. With excellent case vignettes, the authors show how the interview process is carried out and offer strategies for responding to patients with limited capacities.

Psychological Evaluations for the Courts, Third Edition Gary B. Melton,John Petrila,Norman G. Poythress,Christopher Slobogin,2007-09-18 This is the definitive reference and text for both mental health and legal professionals. The authors offer a uniquely comprehensive discussion of the legal and clinical contexts of forensic assessment, along with best-practice guidelines for participating effectively and ethically in a wide range of criminal and civil proceedings. Presented are findings, instruments, and procedures related to criminal and civil competencies, civil commitment, sentencing, personal injury claims, antidiscrimination laws, child custody, juvenile justice, and more.

Competency to Stand Trial Ronald Roesch,Stephen L. Golding,1980

Children's Rights in Health Care Jozef H.H.M. Dorscheidt,Jaap E. Doek,2018-11-26 While coordinating the University of Groningen's Honours College Winterschool/Atelier entitled *Children's Rights in Health Care*, the need to publish the contributions to this program was generally expressed and confirmed by its participants. The Winterschool/Atelier, successfully organized in recent years, has dealt with many issues concerning the legal position of minor persons – born and unborn – in the context of health care, especially pediatric care. These issues involve matters concerning pediatric treatment,

preventive care and predictive medicine, medical research involving children, incompetence and child autonomy, a child's psychological development, parental responsibility and representation, protective judicial measures, child migration issues, children's health rights enforcement as well as children's health interest monitoring and promotion. During the program, leading experts in the fields of law, ethics, medicine, biology, psychology and institutions such as the Dutch Child & Hospital Foundation, the Child Protection Board, Save the Children, and UNICEF shared their views on normative standards, practical experiences, significant developments, challenging ideas, silent dreams and inevitable realities. As a result, the Children's Rights in Health Care program provided opportunities for a profound dialogue between Honours College students and lecturing scholars on a wide range of topics involving children's health care interests. This volume contains several analyses of health rights issues related to children. The various chapters provide an overview of this captivating area and may be of special interest to lawyers, health care professionals, ethicists, psychologists, judicial institutions, policy makers, interest groups, students and all others who are concerned with the children's rights perspective on health care.

The International Handbook on Psychopathic Disorders and the Law Alan Felthous, Henning Saß, 2008-03-10 The economic impact of society's efforts to rehabilitate and contain psychopathically disordered individuals can be enormous. Understanding these disorders, developing valid assessment methods and providing safe, effective treatments is therefore of paramount importance. Reflecting the work of a truly international panel of experts from Europe, North America and Asia, the International Handbook on Psychopathic Disorders and the Law offers an in-depth, multidisciplinary look at key aspects of the development and etiology of psychopathic disorders, current methods of intervention, treatment and management, and how these disorders impact decision-making in civil and criminal law.

Essentials of Forensic Psychological Assessment Marc J. Ackerman, 2010-04-06 Quickly acquire the knowledge and skills you need to confidently administer, score, and interpret the key assessment instruments used by forensic psychologists. Mental health professionals are frequently called on to perform forensic assessments for a wide variety of court cases. To use these instruments properly, professionals need an authoritative source of advice and guidance on how to administer, score, and interpret them. Now fully revised and in a second edition, *Essentials of Forensic Psychological Assessment* is that source. The Second Edition is completely updated to reflect current research and theory in the field, including the most recent codes and standards published by the American Psychological Association. In addition, this volume offers updated coverage of the most frequently used instruments in forensic psychological assessments, including the MMPI®-2 and MMPI-2-RF, PAI®, Rorschach®, ASPECT, and various neuropsychological assessment instruments. Like all the volumes in the *Essentials of Psychological Assessment* series, this book is designed to help busy mental health practitioners, and those in training, quickly acquire the knowledge and skills they need to make optimal use of major psychological assessment instruments. Each concise chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative

material, as well as test questions that help you gauge and reinforce your grasp of the information covered. Written by a noted forensic psychologist, the Second Edition offers in-depth coverage of maltreatment and domestic violence, as well as the assessment of recidivism, fitness to stand trial, civil commitment, substance abuse assessment, custody evaluations, personal injury assessments, and many other aspects of forensic mental health practice.

The Handbook of Forensic Psychology Irving B. Weiner, Allen K. Hess, 2006-04-20 This is a fully-revised and updated version of the top academic work in forensic psychology. Focussed mainly on the practical aspects of forensics, this volume provides all readers need to know to be effective practitioners. Detailed sections cover both civil and criminal forensic practice; forensic report writing; treating mental illness in the incarcerated; and ethical issues. Contributors are the best-known and most respected practitioners in the field from the US and Canada. All chapters are completely revised from the previous edition, including 6 which have new authors. Forensic psychology is one of the fastest-growing specialties in the field. Its practitioners are able to avoid managed care and structured settings, and they often focus on assessment, rather than long-term treatment of clients. With the growing public interest in all things forensic, most graduate programs in psychology have added at least one course in forensic psychology over the past few years; and more established professionals are entering the field every day.

Antipsychotic Trials in Schizophrenia T. Scott Stroup, Jeffrey A. Lieberman, 2010-04-01 Antipsychotic medications are a key treatment for schizophrenia and sales of antipsychotic drugs approach \$20 billion per year, with fierce marketing between the makers of the drugs. The U.S. National Institute of Mental Health sponsored the Clinical Antipsychotic Trials of Intervention Effectiveness (CATIE) project to provide independent information about the comparative effectiveness of medications. CATIE was the largest, longest and most comprehensive study of schizophrenia to date. Conducted under rigorous double-blind conditions, *Antipsychotic Trials in Schizophrenia* presents the definitive archival results of this landmark study. The core of the book consists of chapters focused on specific outcomes that set the CATIE findings in a wider context. Also included are chapters on the design, statistical analyses and implications for researchers, clinicians and policy makers. Psychiatrists, psychiatric researchers, mental health policy makers and those working in pharmaceutical companies will all find this to be essential reading.

Unfitness to plead Great Britain: Law Commission, 2010-10-27 This paper discusses the law on unfitness to plead or to be tried in criminal proceedings. The law on unfitness to plead is concerned with whether or not an accused is able to stand trial and, if not, the procedure that should be used to deal with that accused. Where there is an issue of unfitness to plead it is not the accused's guilt that is considered but whether they are 'under a disability' and if so the jury must determine whether or not the accused did the act or made the omission charged. In this paper the analysis of the modern law on unfitness to plead is set within the broader context of the law relating to vulnerable defendants, the Mental Health Act 1983

as amended by the Mental Health Act 2007, and the Mental Capacity Act 2005. A number of proposals are put forward, primarily that there should be a new revised single legal test which assesses whether the accused has decision-making capacity for trial. The test should not require that any decision the accused makes must be rational or wise

Competence Assessment in Dementia European Dementia Consensus Network, 2007-12-29 The increasing proportion of demented elderly in populations, debates over patient's rights and autonomy, and the growing body of knowledge on dementia has inspired the European Dementia Consensus Network to regard competence assessment in dementia as an important topic of debate. This book contains a summarised consensus as well as chapters on state-of-art neuropsychological functions and how they relate to competence, and chapters discussing ethical, legal perspectives.

Encyclopedia of Psychology and Law Brian L. Cutler, 2008 Over 350 entries provide an authoritative & comprehensive A-Z list of topics in psychology and law, including criminal behaviour and treatment, juvenile offenders, eyewitness memory, forensic assessment and diagnosis, and trial processes.

Psychological Evaluations for the Courts, Fourth Edition Gary B. Melton, John Petrila, Norman G. Poythress, Christopher Slobogin, Randy K. Otto, Douglas Mossman, Lois O. Condie, 2017-12-22 Tens of thousands of readers have relied on this leading text and practitioner reference--now revised and updated--to understand the issues the legal system most commonly asks mental health professionals to address. Highly readable, the volume demystifies the forensic psychological assessment process and provides guidelines for participating effectively and ethically in legal proceedings. Presented are clinical and legal concepts and evidence-based assessment procedures pertaining to criminal and civil competencies, the insanity defense and related doctrines, sentencing, civil commitment, personal injury claims, antidiscrimination laws, child custody, juvenile justice, and other justice-related areas. Case examples, exercises, and a glossary facilitate learning; 19 sample reports illustrate how to conduct and write up thorough, legally admissible evaluations. New to This Edition *Extensively revised to reflect important legal, empirical, and clinical developments. *Increased attention to medical and neuroscientific research. *New protocols relevant to competence, risk assessment, child custody, and mental injury evaluations. *Updates on insanity, sentencing, civil commitment, the Americans with Disabilities Act, Social Security, juvenile and family law, and the admissibility of expert testimony. *Material on immigration law (including a sample report) and international law. *New and revised sample reports.

Principles of Forensic Mental Health Assessment Kirk Heilbrun, 2006-04-11 Unlike most of the literature in forensic mental health assessment, this book posits the existence of broad principles of forensic assessment that are applicable across different legal issues and are derived from and supported by sources of authority in ethics, law, science, and professional practice. The author describes and analyzes twenty-nine broad principles of forensic mental health assessment within this framework.

Research Methods in Forensic Psychology Barry Rosenfeld, Steven D. Penrod, 2011-04-12 The only professional resource to focus exclusively on research methods in forensic psychology With specific advice on topics of particular importance to forensic specialists, *Research Methods in Forensic Psychology* presents state-of-the-discipline summaries of the issues that relate to psychology and law research. Edited by renowned experts in the field, this resource features contributions by leading scholars in forensic psychology and law, with discussion of relevant topics such as: Meta-analysis Jury decision making Internet-based data collection Legal research techniques for the social scientist Offender treatment Competence to stand trial Criminal profiling False confessions and interrogations Trial-related psycho-legal issues Accuracy of eyewitnesses and children Violence risk assessment This comprehensive guide is designed for a wide range of scholars and legal professionals, presenting a succinct overview of the field of psychology and law as viewed by some of the world's foremost experts.
