**Strategic Management and Economics in Health Care** Michael Chletsos, Anna Saiti, 2020-01-01 This book offers significant managerial and economic knowledge on hospitals, and will serve as a valuable tool for explaining complicated managerial and economical problems, and for facilitating decision-making processes. It bridges management and economic sciences - two complementary sciences that feed the process of making rational decisions. With particular reference to the education, the main aim of this book is to provide students of relevant schools and departments with the knowledge (managerial and economic) that will enable them to deal both efficiently and effectively with the real problems arising in a health care organization such as a hospital. In particular, by equipping students with appropriate managerial and economic knowledge, the aim is to give them a clear understanding of HOW to deal with the diverse and complex problems of hospitals while at the same time helping them to develop strategic approaches that will make hospitals more efficient and sustainable.

Strategic Management in Public Services Organizations Ewan Ferlie, Edoardo Ongaro, 2015-02-20 Strategic Management in Public Services Organizations sets out to connect the two traditionally disparate academic literatures of public management and strategic management. The authors argue that some models of strategic management are now of enhanced relevance for contemporary public services organizations, especially when considering successive New Public Management reforms. This observation has important consequences for the requisite work practices, skills and knowledge bases of current public managers, as they are increasingly being asked to act as strategic as well as operational managers. Strategic Management in Public Services Organizations takes a strongly comparative and international perspective in addressing the fundamental issue of strategic management within diverse public administrative traditions. The impact of strategic management on the performance of public agencies is examined and it is argued that the appropriate use of strategic management models depends on the politico-administrative and cultural contexts of the public services organization in question, concluding that there is no single best way to strategically lead public organisations. This is an advanced textbook aimed at the postgraduate level, particularly students on MPAs and MBAs with a public sector option or MScs in Public Policy and Public Management.
